#### SKILLS:

- AutoDesk CAD (Computer-Aided Design) Certified
- Volunteer at Public Library (TAG board member)
- Experienced in Maya, Autodesk, Photoshop, MIT App Inventor
- Skilled artist (10+ years of experience) AP 2D Art student

Hello, my name is Aastha Bhabal, and I am a Senior at Dublin High School. I will graduate in 2024 from high school. I am planning to major in Industrial product design. Completing 4, or maybe even 6 years to graduate. I will do everything in my power to ensure that it happens. Including continuing my education, and getting the best grades possible. Since I was a child I've always been interested in art, however I knew that a regular career in studio art wouldn't fulfill my passion for the fast-growing advancements in technology. Industrial design combines all of my passions into one.

In terms of my personal qualities, I would say, I am an open-minded, optimistic, methodical extrovert. I enjoy working in teams. I make sure everyone's ideas are heard, and I get people talking. When I need to complete a task, I will devote as much time as needed until it is completed. I am persistent. Some of my proudest accomplishments are my grades. As mentioned before, I work my hardest to get the best grades; Getting an honor roll every semester of middle school. In high school, I got an honor roll every semester so far.

I work hard outside of school as well, I am working diligently to earn my black belt in Karate, and I got a gold medal after completing my swimming academy. I play other sports too; soccer, tennis, and badminton. I also enjoy dancing. I have gotten multiple places in the competitions I enter. I love giving back to my community. Volunteering at libraries or babysitting the little kids in my neighborhood are some of the ways I help out. When my 5th-grade teacher needed help switching classrooms, I helped out by grading papers and moving boxes. I plan on creating a non-profit organization to help out people around the world who could need it. I have an idea of my own where I construct shelters for the homeless to keep them shielded from harsh weather when forced to sleep outside. From my experiences, I found out more about myself. I know that I am a big people pleaser, and considerate and cooperative. In stressful situations, I can keep a cool head. I can methodically create a quick and realistic plan. I enjoy helping people whenever I can.

Being a senior in high school, I want to get as much experience as I can about my chosen major, before going to college and pursuing it full-time. Hopefully, this essay gave you some insight into who I am; and my plans for the future. Thank you for your time, and if you have any questions, contact me at [aasthabhabal10@gmail.com](mailto:aasthabhabal10@gmail.com).  
Thank You!
